GIT COMMITS

~1,800

LINES OF CODE

✓ Completed Features (All 10)

✓ DEPLOYED

1. Credit Orders Filter

Location: Orders Page → Credit Orders Tab

Commit: [51d0395](#)

- 4 filter tabs: All Orders, Active, Completed, Credit Orders
- Purple badges for credit payment methods
- Badges show "Paid on Credit (Card)" or "Paid on Credit (Loan)"

- Mock data: 7 total orders, 3 paid on credit

File: unified-frontend/src/pages/consumer/OrdersPage.tsx

✓ DEPLOYED 2. NFC Card Order History

Location: Wallet Page → My Cards → View Orders Button

Commit: [39d8259](#)

- Shopping cart icon button on each NFC card
- Purple-themed modal showing order history per card
- Displays: order number, shop name, location, amount, items, date
- Card 1: 4 orders totaling 100,500 RWF
- Card 2: 2 orders totaling 85,000 RWF

File: unified-frontend/src/pages/consumer/WalletPage.tsx

✓ DEPLOYED 3. Daily/Weekly Loan Frequency

Location: Wallet Page → Request Loan Modal

Commit: [52edb25](#)

- Radio button group with Daily and Weekly options
- Weekly is default selection
- Solid button style with 50/50 layout
- Required field validation

File: unified-frontend/src/pages/consumer/WalletPage.tsx

✓ DEPLOYED 4. "My Orders" Mobile Navigation

Location: Bottom Navigation Bar (Mobile)

Commit: [2acc135](#)

- Changed mobile nav label from "Orders" to "My Orders"
- Consistent with desktop menu label
- Better clarity for users

File: unified-frontend/src/components/AppLayout.tsx

✓ DEPLOYED 5. Gas 300 RWF Minimum Validation

Location: Gas Page → Custom Amount Input

Commit: [b6ebe03](#)

- Validation on custom amount field (minimum 300 RWF)
- Error message: "Minimum top-up amount is 300 RWF"
- Visual error state on input when below 300 (red border)
- Help text showing "Minimum: 300 RWF"
- Prevents submission with invalid amount

File: unified-frontend/src/pages/consumer/GasPage.tsx

✓ DEPLOYED 6. Rewards Page Cleanup

Location: Rewards Page

Commit: [b6ebe03](#)

- Removed entire tier system (Bronze/Silver/Gold/Platinum)
- Removed tier progress bars and multipliers
- Simple purple gradient header
- Shows only "Rewards Points" title
- Displays current points and lifetime points
- Kept Overview and History sections

File: unified-frontend/src/pages/consumer/RewardsPage.tsx

✓ DEPLOYED 7. Registration Link on Login

Location: Login Page → Consumer Tab

Commit: [b6ebe03](#)

- "First time using BIG Company?" text
- "Create Account" link in purple color
- Hover effect with underline
- Links to /auth/register
- Only shows for consumer role tab

File: unified-frontend/src/pages/auth/LoginPage.tsx

✓ DEPLOYED 8. Mock Orders Data

Location: Orders Page

Commit: [51d0395](#)

- 7 realistic mock orders
- Mix of payment methods: wallet, mobile money, card credit, food loan
- Different statuses: pending, shipped, delivered, cancelled
- Proper data structure for all fields
- Ready for backend API integration

File: unified-frontend/src/pages/consumer/OrdersPage.tsx

✓ DEPLOYED

9. Credit Ledger Page

Location: /consumer/loans/ledger (New Page)

Commit: [69820d0](#)

- Loan summary card with purple gradient background
- Real-time countdown timer to next payment deadline
- Outstanding balance vs. paid amount statistics
- Complete payment schedule table with status badges
- Two payment methods: Dashboard Balance & Mobile Money
- Payment modal with form validation
- Mock data: Active loan with 7 weekly payments (3 paid, 4 upcoming)
- Responsive design with Ant Design components

File: unified-frontend/src/pages/consumer/CreditLedgerPage.tsx (NEW)

✓ DEPLOYED

10. Credit Transactions Page

Location: /consumer/loans/transactions (New Page)

Commit: [69820d0](#)

- 4 filter tabs: All Transactions, Loans Given, Payments Made, Card Orders
- Color-coded transaction icons (green for loans, blue for payments, purple for card orders)
- Detailed transaction list with shop names for card orders
- Transaction summaries showing totals by type
- Badge counts on each tab showing number of transactions
- Mock data: 8 diverse transactions including 1 loan, 3 payments, 4 card orders
- Amount prefixes: + for loans, - for payments/purchases

File: unified-frontend/src/pages/consumer/CreditTransactionsPage.tsx (NEW)

🔧 Technical Implementation

Technology Stack

React 19

TypeScript

Vite

Ant Design (antd)

React Router DOM

Railway (Deployment)

GitHub Actions

Files Modified/Created

File Path	Type	Changes
unified-frontend/src/pages/consumer/OrdersPage.tsx	Modified	Added credit filter, purple badges, mock data
unified-frontend/src/pages/consumer/WalletPage.tsx	Modified	Added card order history, loan frequency selector
unified-frontend/src/components/AppLayout.tsx	Modified	Updated mobile navigation label
unified-frontend/src/pages/consumer/GasPage.tsx	Modified	Added 300 RWF minimum validation
unified-frontend/src/pages/consumer/RewardsPage.tsx	Modified	Removed tier system, simplified UI
unified-frontend/src/pages/auth/LoginPage.tsx	Modified	Added registration link for consumers
unified-frontend/src/pages/consumer/CreditLedgerPage.tsx	Created	New page: Loan payment management interface
unified-frontend/src/pages/consumer/CreditTransactionsPage.tsx	Created	New page: Credit transaction history
unified-frontend/src/App.tsx	Modified	Added routes for new pages

📄 Git Commit History

69820d0

feat: Complete all 10 customer portal features
Added Credit Ledger and Credit Transactions pages

b6ebe03

feat: Complete customer portal features batch
Gas validation, Rewards cleanup, Registration link

2acc135

feat: Update mobile navigation label to "My Orders"
Better UX consistency

52edb25

feat: Add Daily/Weekly repayment frequency to loan request
Enhanced loan request form

39d8259

feat: Add View Orders button to NFC Cards with order history
Card-specific order tracking

51d0395

feat: Add Credit Orders filter with purple badges to OrdersPage
Credit payment filtering

Deployment Information

Environment	Status	Details
Production	✓ LIVE	https://unified-frontend-production.up.railway.app/consumer
Platform	✓ Active	Railway (Auto-deploy from GitHub)
Build	✓ Success	Bundle: index-B_vD60QR.js (832.63 KB gzipped)
GitHub Repo	✓ Pushed	github.com/maanisingh/big-company

Testing Checklist

Feature	Test URL	Key Test Points
Credit Orders Filter	/consumer/orders	Click "Credit Orders" tab, verify 3 orders with purple badges
Card Order History	/consumer/wallet	Click shopping cart icon on NFC cards, see order modals
Loan Frequency	/consumer/wallet	Click "Request Loan", verify Daily/Weekly selector
My Orders Nav	Mobile view	Check bottom nav shows "My Orders"
Gas Minimum	/consumer/gas	Enter amount < 300, see error message
Rewards Cleanup	/consumer/rewards	Verify no tier badges/progress bars
Registration Link	/login (Consumer tab)	See "Create Account" link below form
Credit Ledger	/consumer/loans/ledger	View loan details, countdown timer, payment schedule

Credit

Design Consistency

Color Palette

Color	Hex Code	Usage
Purple	#722ed1	Credit features, card orders, primary actions
Green	#52c41a	Loan disbursements, success states, positive amounts
Blue	#1890ff	Payments made, info states, active elements
Red	#ff4d4f	Overdue payments, errors, urgent actions
Gray	#8c8c8c	Secondary text, placeholders, disabled states

Next Steps & Recommendations

- **Backend Integration:** Replace all mock data with real API calls (search for "TODO: Replace with real API")
- **Testing:** Perform comprehensive user acceptance testing on all 10 features
- **Performance:** Consider code-splitting for better initial load times
- **Analytics:** Add event tracking for user interactions with credit features
- **Documentation:** Create user guides for credit ledger and transaction pages
- **Security:** Implement proper authentication checks for sensitive loan data
- **Mobile Testing:** Test all features on various mobile devices and screen sizes
- **Accessibility:** Add ARIA labels and keyboard navigation support

API Endpoints Required

```
GET /api/consumer/orders # All orders GET /api/consumer/orders?payment_method=card_credit # Credit orders
filter GET /api/consumer/cards/:cardId/orders # Card order history POST /api/consumer/loans/request #
Loan request with frequency GET /api/consumer/loans/ledger # Active loan details GET
/api/consumer/loans/transactions # Credit transaction history POST /api/consumer/loans/payment # Make
loan payment GET /api/consumer/gas/meters # Gas meters list POST /api/consumer/gas/topup # Gas top-up
with min validation GET /api/consumer/rewards/balance # Rewards points balance GET
/api/consumer/rewards/history # Rewards transaction history
```

Project Complete!

All 10 customer portal features successfully implemented and deployed to production.
